The Guardian System™

Monitors & Guards Against
 Temperature
 Water Level
 Intrusion

The Guardian System™ gives you the choice of monitoring for loss of power plus high water, temperature or intrusion depending on your specific needs. The Guardian System™ is portable, easy to install and operate. You can choose to monitor for high water in your basement during the spring flooding season. Then move Guardian System™ to your cottage in the winter to monitor temperature.

Features

Once installed you simply log onto our secure web-site and program which sensor you are using and what telephone numbers, emails, and SMS text message recipients you want the Guardian System™ to contact. You have the freedom of changing contact information or sensors at anytime.

If a sensor is triggered you will receive an event specific automated message.

Guardian System™ Sensors

Intrusion

Monitors for unauthorized entries. Alerts you of any illegal entry.

Temperature

Monitors ambient air temperature ranges. Alerts you when the temperature is above 110°F or below 38°F.

Water Level

Monitors water level. If water level exceeds the float switch.

You can take the proper action and avoid damage or loss. Our website, www.theguardiansystem.com can assist you with everything from the initial setup to on-going support and new product information.

- The Guardian System™ includes:
- ✓ Base Unit with Antenna
 - ✓ Power Adapter
 - ✓ Intrusion Sensor
 - ✓ Temperature Sensor
 - ✓ Water Sensor
 - ✓ Loss of Power Sensor (Internal)
 - ✓ Pre-Installed Battery
